

Internationalized Domain Names

Rinalia Abdul Rahim, ICANN Board | APrIGF | 28 July 2016

Asia and the Next Billion Internet Users

◎ 3 billion Internet users in the world

◎ Asia Internet penetration still low

◎ Asia - majority of next billion people coming online

Source: www.internetworldstats.com; Euromonitor

Context for IDN: A multilingual world with diverse writing systems/scripts

- ◉ More than 7000 living languages in the world
 - ◉ about 50% spoken in the Asia Pacific region
- ◉ Numerous writing systems/scripts (fewer than languages)
 - ◉ Examples: Han and Arabic
- ◉ IDNs meant to serve the online needs of a world that is diverse in languages and script
- ◉ IDNA Protocol developed by IETF in 2003
- ◉ IDN TLDs introduced into the Root Zone
 - ◉ IDN ccTLD in 2010
 - ◉ IDN gTLD in 2013

Internationalized Domain Names (IDNs)

- ⦿ IDN – Domain Names that can be represented in scripts, in addition to Latin, e.g. Chinese, Thai, Devanagari and Arabic
- ⦿ IDNs enable opportunities for local communities to come online

ASCII and IDNs

www.cafe.com

Third Level Domain Second Level Domain Top Level Domain (TLD)

Syntax of ASCII TLD

Use only **Letters** [a-z]

ตัวอย่าง-ไทย

IDN Second Level Domain IDN Level Domain (TLD)

Syntax of IDN TLD

U-Label, constrained by the **"letter"** principle

What is a "letter" in a script?

Are all "letters" unique in a script?

Overview of IDN Program at ICANN

- ◉ IDNs at Top Level

Communications Plan Execution

IDN Country Code Top-Level Domains

ccTLDs: 53 for 39*

* Successfully evaluated IDN ccTLDs for total countries and territories

IDN TLD Program: Label Generation Rules (LGR) for the Root Zone

- ◉ Need for community to determine valid and unique IDN Top Level Domains (TLDs)
- ◉ For each script or writing system, community to define:
 - ◉ Which code points are valid for use?
 - ◉ Are any of these code points variants of each other?
 - ◉ Are there any additional constraints on the labels?

Label Generation Rules (LGR)

Chinese
Cyrillic
Ethiopic
Georgian
Greek
Japanese
Khmer
Korean
Lao
Latin
Myanmar
Neo-Brahmi
Thai

Maximal Starting Repertoire (MSR)

Root Zone LGR Procedure

Coordination Challenges

- ◉ Some writing systems share same script, so need to coordinate for variant sets
 - ◉ Chinese, Japanese and Korean all use Han script
- ◉ Some writing systems have cross-script variant letters, so need to coordinate to identify them
 - ◉ Some letters among Khmer, Lao and Thai look similar
 - ◉ Some letters among Armenian, Cyrillic, Greek and Latin look the same as letters in other scripts in this set

How to get involved?

Volunteer

Volunteer for your script Generation Panel (GP)

To contribute expertise, contribute to the GP for your script. You can get involved by simply emailing your CV and a brief statement of interest to identlds@icann.org

Review

Review work through public comments

Sign up for the IDN mailing list vip@icann.org (to sign up, visit <https://mm.icann.org/listinfo/vip>) and participated in the review of IDN work being done at ICANN through the public comments

Listen

Keep yourself updated

Attend regular IDN Program Update sessions at ICANN meetings and sign up on the IDN mailing list vip@icann.org to get updates on the IDN Program at ICANN
